

CloudSentrix Security Report

Source: sample_data/sample_gcp_iam.json | Generated: 2026-08-04 22:33 UTC

Executive Summary

Overall Security Score: **35/100 (Poor)**
Findings: 2 Critical, 1 High, 0 Medium, 0 Low

This project's security posture is rated POOR at 35/100. There are 2 critical findings that should be addressed immediately, as these represent direct paths for an attacker to gain broad control over the project. Overall, 2 critical, 1 high, 0 medium, and 0 low-severity issues were identified. See the findings section below for full details and recommended remediation steps.

Findings (3)

Severity	Finding	Principal	MITRE	Details
CRITICAL	Service Account Token Creator (GCP-002)	app-backend@my-project.iam.gserviceaccount.com	T1098.001	'app-backend@my-project.iam.gserviceaccount.com' holds 'roles/iam.serviceAccountTokenCreator' at project level, letting it mint short-lived access tokens for any service account in the project — effectively becoming that service account, no key required.
CRITICAL	IAM Policy Administrator (GCP-004)	admin@company.com	T1098.003	'admin@company.com' holds 'roles/owner', which can modify the project's IAM policy directly — including granting itself or any other principal additional roles.
HIGH	Service Account Impersonation via Resource Attach (GCP-005)	intern@company.com	T1548.005	'intern@company.com' holds 'roles/iam.serviceAccountUser' and can also create new resources via roles/editor. It can deploy a new resource (e.g. a VM or Cloud Function), attach a service account to it, and run as that service account.

Blast Radius (top 10)

Principal	Blast Radius	Can Reach
admin@company.com	100.0%	analyst@company.com, app-backend@my-project.iam.gserviceaccount.com, intern@company.com
intern@company.com	33.3%	app-backend@my-project.iam.gserviceaccount.com
app-backend@my-project.iam.gserviceaccount.com	0.0%	(nothing further)
analyst@company.com	0.0%	(nothing further)
